

Zirlux® NP

Zirlux® NP is a nickel- and beryllium-free, non-precious cobalt-based dental milling alloy that can be used for precise and accurate milling.

Benefits:

- Available in 98.5mm discs
- Milled for fixed and removable restorations
- Minimal preparation is required for use as these restorations are near-ready for veneering after production, saving time in the workflow process
- Well-tolerated intraorally due to its inherent compatibility

Indications:

- Copings and Bridge Frameworks
- Partial Denture Frameworks
- Telescopic Crowns

Material Properties

Hardness (HV 10): 285
 Tensile Strength: 525MPa
 Elongation (%): 14.7
 0.2% Yield Strength: >375MPa
 Young's Modulus: 240GPa
 Coefficient of Thermal Expansion (25°-500°C) (10⁻⁶/K): 14.5
 Density (g/cm³): 8.5
 Melting Range: 1600-1800
 Corrosion Resistance (g/cm³): <200
